Coupang Business-Internal User Only

MAIN CHALLENGE

Coupang Business-Internal User Only

01 / THE PAST

SHOPPING WAS A PLACE

Discovery was physical, local, and bounded by what the store carried.

01

MALL

Drive to the destination

DESTINATION

02

STORE

Select the store that holds the category of your item

SELECTION

03

COMPARE

Walk store to store,
aisle to aisle,
Item to item

EFFORT

04

CHECKOUT

Purchase in person

TRANSACTION

DISCOVERY WAS LIMITED AND BOUNDED BY LOCATION

Coupang Business-Internal User Only

02 / THE PRESENT

THE STORE MOVED INTO OUR HANDS

The internet removed location and shelf-space constraints.

MILLIONS of products

SEARCH and filter

COMPARE reviews + price

PURCHASE from anywhere

DISCOVERY BECAME UNLIMITED.
BUT THE INTERFACE STAYED THE SAME.

Coupang Business-Internal User Only

REIMAGINE THE SHOPPING EXPERIENCE

AI-FIRST EXPERIENCE

> Reimagine and create an AI-first retail experience that shifts ecommerce from browsing and searching to AI as the primary interface, fundamentally changing how customers discover, evaluate, and purchase products.

DISCOVER → EVALUATE → PURCHASE

Coupang Business-Internal User Only

EXAMPLE: WHAT COULD AI-CORE SHOPPING FEEL LIKE?

Start with the customer's context, then let AI orchestrate the journey.

VOICE

Strong Intent

"Find the cheapest, red color tone socks that matches with my Nike Superfly"

CONVERSE → DECIDE → BUY

VISION

Weak Intent

Using pictures of your home, car, outfit, etc. Recommend products with pictures.

SEE → MATCH → FIT

Personalize

No Intent - Discovery

Content is cheap. Create a premade video or pictures of the user and the product

EXPLORE → UNLOCK → BUY

Coupang Business-Internal User Only

HOW YOUR PROJECT WILL BE MEASURED

7 min Demo / Presentation starting 9am SGT

Judges will score each dimension from 1–10 using the same anchors across every team.

01	**AI-FIRST TRANSFORMATION**	AI is the core interaction model, not an add-on. The experience should use intent, dialogue, vision, context, or action to change how customers discover, evaluate, and purchase.
02	**CUSTOMER VALUE & EXPERIENCE**	The project addresses a meaningful retail need and makes shopping easier, faster, more confident, or more engaging through an intuitive flow and useful customer control.
03	**INNOVATION & DIFFERENTIATION**	The concept presents a distinctive point of view and moves beyond a standard chatbot or incremental feature. The idea should feel memorable and difficult to replicate without AI.
04	**EXECUTION & FEASIBILITY**	The demo proves the core journey works. Judges will consider prototype quality, technical architecture, use of data and models, scalability, and a realistic path toward production.
05	**RESPONSIBLE AI & SAFETY**	The solution builds trust through accuracy, transparency, privacy, security, and appropriate safeguards. Customers should understand the AI's role and remain in control.

YOUR TURN

BUILD THE EXPERIENCE CUSTOMERS WILL ASK FOR

Not a feature added to ecommerce.
A new way to shop, designed around AI.

HUMAN — Is it effortless?

INTELLIGENT — Does context compound?

TRUSTED — Can customers stay in control?
